

# Summary of Impacts by Community

OEA developed the Summary of Impacts by Community Table to provide readers with one source for data about the Proposed Acquisition's potential impacts at a community level. OEA included communities that have receptors that could potentially experience noise impacts, increased trains per day (TPD), and grade crossing safety or delay. For a complete understanding of the approach to the analysis, the affected environment, and the environmental consequences, the reader should consult the individual impact analysis topics in their respective chapters and appendices.

Accompanying notes for the community impacts table are as follows:

- <sup>1</sup> TPD – Trains Per Day. Passenger trains are in parentheses where passenger trains use the segment.
- <sup>2</sup> [For segments where CPKC would maintain trackage rights, the TPD volumes reflect the sum of CPKC and the track owner volumes and may reflect a range if the segment has variable volumes along its length.](#)
- <sup>3</sup> Noise sensitive receptors (receptors) include residences, schools, hospitals, nursing homes, and places of worship. The Proposed Acquisition would adversely affect a receptor if increased rail traffic would cause an increase in noise level of 3 or more A-weighted decibels (dBA) at the receptor and would cause the day-night average noise level (Ldn) to reach or exceed 65 dBA. Refer to *Section 3.6, Noise and Vibration* for more information about the noise analysis.
- <sup>4</sup> Refer to Table 3.2-9 in *Section 3.2, Grade Crossing Safety* for more information about crossing safety for specific crossings.
- <sup>5</sup> Refer to Table 3.3-11 in *Section 3.3, Grade Crossing Delay* for more information about vehicle delay at specific grade crossings.
- <sup>6</sup> Environmental Justice (EJ) Block Groups refer to U.S. Census Block Groups that meet the definition of potentially containing an EJ population, such as low-income or minority populations. For more information about the EJ analysis, refer to *Section 3.13, Environmental Justice*.
- \* Community with planned capital improvements nearby. Refer to **Table 2.2-4** in *Chapter 2* for more information on planned capital improvements.

**Table E.1-1. Summary of Impacts by Community**

Community Name	Railroad Segment	TPD <sup>2</sup>		Noise	Grade Crossing		Environmental Justice (EJ)
		2027 No Action Freight TPD (Existing Passenger TPD) <sup>1</sup>	2027 Proposed Acquisition Freight TPD (Existing Passenger TPD)	Number of Receptors Adversely Affected <sup>3</sup> (Within 65 dBA Ldn and 3 dBA Increase)	Crossings with Increased Safety Risk <sup>4</sup>	Crossings with Increased Delay <sup>5</sup>	Percentage of Adversely Affected Receptors within EJ Block Groups <sup>6</sup>
